Note: 1. *Renewable Energy includes biomass and waste, conventional hydroelectricity, geothermal, solar PV, wind power, and solar thermal.

2. The numbers may not add up to the totals due to rounding.

Table2. Total Domestic Energy Consumption by Sector

Residential Sector	160.3	7.6	153.9	7.3	154.7	7.6	4.1	3.6

Note: 1. *Industrial Sector includes Non-Energy Use (referring to the energy products that are not used for combustion. Naphtha used as petrochemical feedstocks is the bulk).

2. The numbers may not add up to the totals due to rounding. And industries with major changes in each sector are not completely listed, and therefore, the listed industries do not add up to the totals of related sectors.
